INTERNATIONAL SCIENTIFIC CONFERENCE ON FARM ANIMAL NUTRITION

ZADRAVEC-ERJAVEC DAYS 2026

International scientific symposium

12th and 13th November 2026
(Thursday, Friday)

Congress Hall
Hotel Radin
Radenci

The 34th International Scientific Conference on farm animal nutrition is approaching. We cordially invite you to actively participate in the conference by submitting your scientific contributions. We live in a time of very fast information flows, where numerous scientific studies are being conducted worldwide on how to produce enough food for the population of planet Earth. The question is how to manage that, definitely not for any price, not if we permanently destroy soil fertility, drink water quality and cause climate overheating.

For the conference ZED 2026 we ask the authors of the contributions to try and find a balance between farm animal keeping and nature preservation, bio-diversity and emission protection, between food production intensity and animal wellbeing, between production economy and animal longevity, between nitrate use and preserving drink water purity, between nutrient circulation and soil fertility improvement. This year, we also aim to further enrich the program by including the topic of digitalization in agriculture. Is the future of European agriculture in digitalization? The overall **aim of contributions should focus on environmental protection, improvement of cattle rearing conditions and economy in order to produce high quality food with competitive prices for the consumer** and hence also ensure a decent existence for farmers, population of rural areas and preservation of cultural landscapes in the entire »from farm to fork« chain.

Registered lecturers, who's papers will be included in the programme, shall receive detailed instructions as regards the final form of their contributions to be published in the *Proceedings of the meeting* at a later stage and the papers shall be registered in international data bases CAB Abstracts and AGRIS, via the Slovenian National Centre at the Faculty of Biotechnology in Ljubljana, again this year.

Contributions at the meeting can be made as **lectures (15 - 20 min)** or **posters** (with 5 min presentation). The languages to be used are Slovene, English and German. On both conference days, simultaneous interpretation shall be provided (English, German → Slovene and Slovene → English).

The authors are invited to register their papers with a title and a short summary in Slovene or English until **2nd June 2026** on:

<https://forms.gle/ozP5kLJQ7Qs6dVpZ9>

The programming committee shall make a selection of contributions based on the given topics and invite the authors to prepare full papers in writing by **30th June 2026**. The list of submitted and accepted contributions will be published on the website <http://www.kgzs-ms.si>.

THE DEADLINE FOR THE SUBMISSION OF PAPERS is the **10th September 2026**. The papers received will be incorporated in the conference programme by the programming committee.

The registration fee for participation on both days of the conference is €190.00 + 22% VAT. The fee includes the Book of Abstracts + USB with the Book of Lectures, coffee breaks, lunch, and the gala dinner. **The registration fee is mandatory for all conference participants.**
